

Planned Grocery™

Get insight into the current Grocery Retail Expansion in the United States like never before.

This application is the **only** subscription service on the market today which exclusively provides data on planned, proposed, under construction, and recently built grocery store developments that is built around a mapping and demographic interface.

Grocery retail concepts that we are tracking include: Albertsons, Aldi, BJ's, Costco, Earth Fare, Fresh Market, Fresh Thyme, Harris Teeter, HEB, Kroger, Lidl, Lowes Foods, Piggly Wiggly, Publix, Sam's Club, Safeway, Save-A-Lot, Sprouts, Stop & Shop, Target, Trader Joe's, Walmart, Wegmans, Whole Foods and Whole Foods 365, and (recently added) Lucky's Market.

This application also includes the existing retail concept locations as well. These locations are provided by our data partner AggData and are updated anywhere from 4 to 12 times a year.

There are built in tools for measurements, ring buffers, and drive times. Demographic layers are included that show population growth, average household income, population density, and Esri Tapestry. All locations are publicly sourced and have a corresponding web-link to the news article with more details.

This is a subscription service. Contact us for pricing. This includes one login per organization. The login is good for home and mobile use, but our terms require that the login is not shared outside of the organization. Contact David Beitz at dbeitz@beitzanddaigh.com or 803-451-0305 for more information.

Optimized for easy use, **Planned Grocery™** includes tools and demographic data from Esri, the world's leading mapping company.

We are currently tracking over 800 grocery events across the United States.

Development Event Phases Tracked:
Proposed, Planned, Under Construction,
and Recently Built
